DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims **1-4, 6, 8-22, and 27-42** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification, while providing for the general display of advertisement either between or during game (Parent patent 5,816,918 at Col 32-57-33-18), and providing a user profile to an advertiser responsive to the selection of a prize by a player (Instant application specification page 29 lines 9-11), does not reasonably provide enablement for “displaying advertisement to a user during redemption of prize credits” nor “providing a profile of the user to an advertiser responsive to displaying advertising from the advertiser”.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method steps of

Art Unit: 3714

“displaying advertisement to a user during redemption of prize credits” and “providing a profile of the user to an advertiser responsive to displaying advertising from the advertiser” in combination with the remainder of the claimed methods must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Response to Arguments

Applicant's arguments dated July 7th, 2009 and with respect to claims **1-4, 6, 8-22, and 27-42** have been considered but are moot in view of the new ground(s) of rejection.

The applicant's remarks allege that the claimed invention including newly presented elements directed to the claim limitations of "displaying advertisement to a user during redemption of prize credits" and/or "providing a profile of the user to an advertiser responsive to displaying advertising from the advertiser" is not provided by the combination of prior art as previously applied. These limitations as introduced though amendment on July 7th, 2009 are new matter not supported by the instant application or either of the parent applications from which the instant application claims priority to. Appropriate correction is required.

Additionally the claimed method of the presented claims is not clearly presented within the drawings of the pending application and appropriate correction is required.

Applicant's specific arguments against the previously applied prior art and combination presented under 35 USC 103 provide commensurate therewith are moot in view of the applicant's claim amendments and subsequent withdrawal of rejections based on 35 USC 103.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
